

Have I got the Coronavirus?

What to know

Feels like
flu or a very bad cold with
a cough, fever, or breathing difficulties

Contact a Health Provider
eg. Healthline (0800 358 5453)
or your GP

They may advise you
to get a COVID 19 test
at a Community Based Assessment Centre

What to do

At a Community Based Assessment Centre
CBAC workers will be dressed
in gloves masks and protective gear

They will test you for COVID 19
with a nose or throat swab

The CBAC will ring you back with results

Until the results come in
you need to separate yourself as much
as possible within your bubble
